UVnet01 | Subnets

Virtual network

Search resources, services, and docs (G+)

Subnet Refresh Manage users Delete Export to CSV

Create subnets to segment the virtual network address space into smaller ranges for use by your applications. When you deploy resources into a subnet, Azure assigns the resource an IP address from the subnet.

Search subnets

Name ↑	IPv4	IPv6	Available IPs	Delegated to	Security group	Route table
Usubnet01	100.0.1.0/24	-	250	-	-	-
Usubnet02	100.0.2.0/24	-	250	-	-	-

Showing 2 subnets

Microsoft Azure portal screenshot showing the Virtual machines page. The page displays a list of virtual machines with columns for Name, Subscription, Resource Group, Location, Status, OS, and Size. Three VMs are selected: Uvm01, Uvm02, and Uvm03. The left sidebar shows the navigation menu with 'Virtual machines' highlighted. The top bar shows the user's profile and the date 23/01/2026.

Name	Subscription	Resource Group	Location	Status	OS	Size
Gvm01	Azure subscrip...	Grg01	West Europe	Running	Linux	Standard_D2s_v1
Gvm03	Azure subscrip...	GRG01	West Europe	Running	Linux	Standard_D2s_v1
Gvm01	Azure subscrip...	Grg01	West Europe	Running	Linux	Standard_D2s_v1
Uvm01	Azure subscrip...	URg01	Central US	Running	Linux	Standard_D2s_v1
Uvm02	Azure subscrip...	URg01	Central US	Running	Linux	Standard_D2s_v1
Uvm03	Azure subscrip...	URg02	Italy North	Running	Linux	Standard_D2s_v1

MobaXterm terminal window screenshot showing a ping command being executed from a virtual machine. The terminal output shows successful ping results for 100.1.1.4. The left sidebar shows the file explorer with the .ssh directory selected. The bottom status bar shows the user's profile and the date 23/01/2026.
